The Veranda collection has simple clean lines softened by round wicker bringing casual comfort to this contemporary design. The collection pairs beautifully with the Coastal dining grouping. Alternatively it can be used in combination with teak or cast aluminum pieces. Veranda is available in a Driftwood or Roasted Pecan finish. Features and Benefits: High density polyethylene weave tolerates the extreme cold of the Canadian climate. Our high-density solid fibre is not prone to splitting, cracking or corroding. The weave contains UV stabilizers to resist fading even when left in direct sunlight all season. The weave colour is all the way through and is varigated to give a "natural" look. The colourants used in the fibre are either organic or eco-friendly and are 100% recyclable. The weave contains no harmful heavy metals such as Cadmium, Lead or Chromium. The fibre is resistant to mold and mildew, moisture, sea water and chlorinated water. Powder-coated frames are made with heavy gauge welded tubular aluminum so they will not rust or loosen over time. Nylon feet on all legs prevents scratching of outdoor surfaces. Cushions are made with resilient "springy" foam and hollofil stuffings to provide long-term comfort and easy drainage. Each cushion is designed with careful attention to detail on buttons, welts, zippers and matching patterns. All materials are mold and mildew resistant. Glass used on tables is tempered and is safe for outdoor use. Care: For best care we recommend that this product be placed in dry storage during winter months. Yardage for cushion is 5 yards.
