

# Grand Pergola, 8.5' X 21.5' X 10' H

ST13-C13.5V-8.5X21.5-10 - Grand Pergola

Width: 260" (660.4 cm)  
Depth: 102" (259.1 cm)  
Height: 120" (304.8 cm)

When the environment requires a structure of significant presence, our Grand Pergola is the perfect solution. Featuring heavy-duty, all-aluminum 6" x 6" columns, our 'Grand Pergola' takes it to the next level. Shown here with vertically oriented 1" x 4" cedar purlins, a variety of inset roof panel options are available to complete your shade structure. Professionally engineered, the Grand Pergola incorporates our proprietary Konnectr System to ensure that each design is as fluid as possible, while still meeting the requisite load and wind analysis. The Hauser Konnectr System, consisting of custom engineered Konnectr Blocks and stainless steel countersunk hardware, ensures that each beam and column connection is seamless, strong and virtually undetectable. Each column consists of built-in surface mount plates for a secure connection, while decorative covers provide the finishing element. The core frame has also been designed to accept a variety of lighting, charging and heat options. Custom sizes and shapes are also available.
