Note: Special order in

Ship to your home or free pickup in store

A cool blast of luxuriously soft hand-knotted viscose/wool in six sophisticated neutrals that add a dose of chic to any room. Viscose-blend rugs offer the same lush feel underfoot as silk, but at a more affordable price. The delicate fibers of viscose-blend rugs are best suited for low-traffic, gently used rooms only. Not suitable for homes with children and pets. FEATURES & BENEFITS: Durable construction; plush, high profile; eye-catching, unusual weave. Because the weave lies in a single direction and is not apt to pull, hand-knotted rugs can appear lighter from one angle than the other - an optical illusion that is part of their appeal. Viscose rugs offer the same feel underfoot as silk rugs. WHERE TO USE: Suitable for low-traffic, gently used rooms only, such as the guest bedroom. Not suitable for homes with children or pets. Please note: It is common for wool rugs to shed, as they are created from natural fibers that form long strands of material that are then hand-knotted to create delightfully soft and durable area rugs. Due to the sheared pile, loose fibers will eventually work their way to the surface. If your wool area rug starts shedding, this is normal. Just trim any tufts of wool that appear with a sharp pair of scissors; do not pull the fibers. Even though shedding does occur -and is not preventable- there are steps you can take to help maintain the shedding of your wool rug. Crafted by artisans committed to fair-labor practices. 94%Viscose/6%Wool Avoid exposure to moisture of any kind, as this may cause permanent staining. Best suited for low-traffic, gently used rooms only. Not suitable for homes with children or pets. Professionally clean only. Made in India.
