

Gloster Sway Bar Chair

HSGL8204

Sku: HSGL8204

Dimensions: 21.5" W x 24" D x 41.5" H

Special order in item

Sway Teak Bar Chair with stainless steel meteor finish; teak frame and graphite sling. Also available with white finish and seagull sling.

The Sway Stacking Bar Chair lives up to its name with a gracefully arched back that gives the taut sling seat its sway. This comfortable bar chair is constructed of solid hardwood teak with powder-coated aluminum details that is available in Meteor. The all-weather sling seat comes in graphite. Gloster buffed teak benefits from an enhanced surface preparation procedure, where the natural oils already contained within the teak are brought to the surface and burnished to produce a rich sheen and a consistent colour. If you intend to use your furniture indoors or under cover outside (where it will not get wet), the teak will retain much of its original colour and the soft sheen of its buffed finish. Sling is a generic term for a woven, open-mesh fabric made from a vinyl coated, high strength polyester yarn. For our sling furniture we use only the highest quality Textilene® and Batyline® woven vinyl. Historically, slings are found combined with powder-coated aluminium frames. However, due to its inherent good looks, exceptional comfort and practicality, we have designed products that combine sling with both teak and stainless steel frames. One of the main benefits of sling is comfort. When stretched taught between two side frames, sling provides a yielding seating surface that moulds to your individual body shape. Our Textilene® and Batyline® woven vinyl is resistant to fading, mildew and wear & tear under the most severe weather conditions.
