

# 73" Extension Table

HSLJ005

Sku: HSLJ005

Dimensions: 29.5" W x 57" /73" L x 29" H

57" (Extends to 73") Aluminum Extension Table with slate grey HPL top with space grey finish.

Terrace table is made of an aluminum structure. It requires no maintenance and doesn't corrode. It won't leave traces of rust on your deck. HPL top is a high-pressure laminate that is highly resistant to UVs, weather abrasion from crockery, stains and scratches. It will heat less in the sun than a steel or aluminum surface of the same color. It can be cleaned easily with a damp cloth. Only the highest grade HPL is used that is made in Italy. Its colours don't fade and the laths don't warp. HPL is non-porous to ensure that your meal surfaces remain hygienic. High pressure decorative laminates, consisting of a surface of decorative paper(s) impregnated with aminoplastic resins and a core made of layers of kraft paper impregnated with phenolic thermosetting resins. All the layers are bonded together with a simultaneous application of heat and high specific pressure to obtain a homogeneous non-porous material with increased density. Easy maintenance and cleaning, no special maintenance required. UV stain and scratch resistant.
