Brussels endows a traditional weaving process with a modern sense of design and durability. The strap used in our Brussels collection is a solution dyed fabric that is resistant to fading, mold and mildew. The inner strength of this material provides durability and at the same time offers flexibility for maximum comfort. This product can be cleaned using a mild detergent and cared for the same way as a patio cushion. The cushions on this collection are made from Sunbrella fabric. They are water repellent, stain resistant and fade resistant. Sunbrella fabric is created by a unique process that adds coloured pigments during fiber production. The colour is locked into the fiber and last as long as the fabric does, resisting fading from UV rays, chlorine, slat water and washing, yet are easy to clean with mild soapy water. The quality of Sunbrella fabrics ensures you will enjoy it for a long time, as they are designed not only to look good, but also to withstand the elements of life. The frame is built on a fully welded aluminum frame and powder coated with a UV stable electro static finish. Covered indoor winter storage is recommended. To keep cushions and frames clean we recommend using our patio furniture covers when furniture is not in use. Yardage for cushion is 7 yards.
